Lorem ipsum dolor sit amet, consectetuer adipiscing elit. Maecenas porttitor congue massa. Fusce posuere, magna sed pulvinar ultricies, purus lectus malesuada libero, sit amet commodo magna eros quis urna.

This is an example equation. It is done inside a table with the table lines hidden.

$$a^2 + b^2 = c^2 \tag{1.1}$$

Commented [SM7]: See https://staff.washington.edu/phurvitz/word_for_social_sciences/captions.html for a good guide on how to insert equation numbers

2 Literature review

2.1 Introduction

Lorem ipsum dolor sit amet, consectetuer adipiscing elit. Maecenas porttitor congue massa. Fusce posuere, magna sed pulvinar ultricies, purus lectus malesuada libero, sit amet commodo magna eros quis urna. Nunc viverra imperdiet enim.

Fusce est. Vivamus a tellus. Pellentesque habitant morbi tristique senectus et netus et malesuada fames ac turpis egestas. Proin pharetra nonummy pede.

Mauris et orci. Aenean nec lorem. In porttitor. Donec laoreet nonummy augue.

This is an example figure.

Commented [SM8]: The most robust way is to insert inside a table with the lines set to be not visible. Some people prefer to put inside a text box.

Insert the caption using 'Insert Caption' on the 'References' tab. I suggest including just the number and then typing in the Fig. by hand. To make the caption text not bold, but keep Figure 2.1 in bold, highlight the "Example figure" and set the style to be "Emphasis"

Remember to try and use "png" for line art (like graphs and drawings) and jpg for images (like photographs) to get the best resolution.

Put references here.

Commented [SM12]: There are multiple ways of inserting references into Word. No examples are given here, as it will depend on which approach you take. You can use an external tool such as Endnote, Menderly or Zotero; or directly in Word use “Manage sources” and “Insert Citation” on the References tab.

You should use an IEEE style (unless you discuss an alternative style with your supervisor).
